

## **Chambers Goals**

1. To correctly apply the law while maintaining a high quality and scholarly work product in the orders and opinions written;
2. To be timely in deciding the matters that come before the court because the parties and attorneys deserve as prompt of a decision as can be rendered without sacrificing the quality of the decision;
3. To be a “user friendly” court for the lawyers, legal staff, litigants, jurors and all others who deal with the court realizing that in a very real sense they are the court’s customers and should be treated in a helpful, friendly and professional manner at all times
